SkillNavora

AI-First Data Engineer

Build reliable data pipelines and the data foundation for AI

DURATION
16 weeks

FORMAT
Live online classes with recordings

TIME NEEDED
10–12 hours a week

FEE
$1,500 · ₹1,30,000 approx.

What you'll be able to do

- Write advanced SQL and production-quality Python for data
- Design data models and warehouses (star schema, lakehouse)
- Build batch and streaming pipelines with Spark, Airflow, dbt and Kafka
- Run data on the cloud with Snowflake, BigQuery or Databricks
- Build AI data pipelines: embeddings, vector databases and RAG
- Ship a portfolio-grade end-to-end data platform

Curriculum

01 SQL for data engineers

Joins, window functions and CTEs · Query performance and indexes · SQL interview patterns

02 Python for data engineering

Python for files, APIs and automation · pandas and Polars · Testing and packaging code

03 Data modelling and warehousing

OLTP vs OLAP · Star and snowflake schemas · Slowly changing dimensions

04 ETL and ELT pipelines

Batch ingestion from APIs and databases · Transformations with dbt · Incremental loads and idempotency

05 Orchestration with Airflow

DAGs, scheduling and retries · Backfills and dependencies · Monitoring and alerting

06 Big data with Spark

Spark and PySpark basics · Partitioning and performance · Lakehouse with Delta Lake

07 Streaming data

Kafka fundamentals · Real-time pipelines · Exactly-once and late data

08 Cloud data platforms

AWS, GCP and Azure data services · Snowflake, BigQuery and Databricks · Cost, security and access control

09 Data quality and governance

Data tests and contracts · Lineage and observability · Privacy and compliance

10 AI for data engineers

Embeddings and vector databases · RAG and LLM data pipelines · AI-assisted coding with Claude Code

11 Capstone, interviews and job assistance

End-to-end data platform capstone · SQL, Python and system design mock interviews · Resume, portfolio and referrals

Projects

- Batch ELT pipeline with Airflow and dbt into a cloud warehouse
- Real-time streaming pipeline with Kafka and Spark
- RAG data pipeline with embeddings and a vector database

Tools you'll use

Code and query

SQL · Python · pandas · Jupyter · Git

Pipelines

Apache Airflow · dbt · Apache Spark · Apache Kafka · Docker

Cloud and warehouse

Snowflake · BigQuery · Databricks · AWS · PostgreSQL

AI

Claude · Claude Code · ChatGPT · GitHub Copilot · Pinecone · Replit

Your instructor

Varun Kumar

Founder and lead instructor, SkillNavora. Product manager and author of the 570-page SkillNavora PM Master Handbook.

Career support

Job assistance

- Resume and LinkedIn makeover with 1:1 reviews
- Portfolio of 25+ case studies, capstone and your live product
- Referrals through our network when you're job-ready
- Job-search strategy: target roles, companies and outreach
- Offer evaluation and salary negotiation guidance

Interview preparation

- Weekly mock tests on product sense, metrics and strategy
- 1:1 mock interviews with detailed feedback
- Question bank: product design, RCA, guesstimates, metrics, behavioural
- AI PM and system design rounds for PMs
- Practice with AI between sessions

Fees and scholarships

$1,500

₹1,30,000 approx. · Includes live classes, real-world projects, capstone, mock interviews and job assistance.

- **Up to 100%: Merit scholarship.** For eligible candidates who do well in the SkillNavora scholarship test and interview. Limited seats every cohort.
- **Students: Students and freshers.** Special pricing for college students and recent graduates, with a valid student or graduation ID.
- **EMI: Flexible payment plans.** Pay the fee in easy monthly instalments, with plans for every cohort.
