SkillOS

MEASURE. DEVELOP. PREDICT.

WORKFORCE CAPABILITY. INTELLIGENTLY.

SkillOS

The Operating System for Workforce Capability

Measure. Develop. Predict.

MEASURE
Assess real capability with data and insights.

DEVELOP
Personalize learning and accelerate growth.

PREDICT
Anticipate future needs and stay ahead.

Empowering organizations to build the right skills, in the right people, at the right time.

The Problem

Companies train employees
but cannot measure capability improvement.
Lots of training. Little visibility. Zero proof of impact.
THE CURRENT REALITY
1. Train
Invest in training and courses
2. Complete
Employees complete courses
3. Report
We get completion reports
4. No Clarity
No visibility into real capability gain
70%
of learning is forgotten within weeks
– McKinsey
$360B+
spent annually on corporate learning globally
– Statista
87%
of L&D leaders can't link training to business impact
– Deloitte
Completion is not capability.
You can't improve what you can't measure.
THE IMPACT
Wasted training budget
Skill gaps remain hidden
Low employee confidence
No ROI on learning investments
Slower business outcomes
Training Completion
85%
Skill Improvement
?
Business Impact
?
Did training actually improve our people's capability?
Most companies still can't answer this.
SkillOS
Measure. Develop. Predict.
We help companies move from training completion to capability improvement.
Measure
Real capability
Develop
What matters
Predict
Future readiness
Drive
Business impact

WHY NOW?

AI adoption, skill obsolescence, and internal mobility are accelerating.

Three powerful shifts are converging to create an urgent need for capability intelligence.

1. AI Adoption is Exploding

Organizations are investing heavily in AI and automation to drive productivity and innovation.

78%

of leaders say AI adoption is a top priority.

– McKinsey, 2024

2. Skill Obsolescence is Accelerating

The half-life of skills is shrinking, and critical skill gaps are widening.

44%

of core skills will change in the next 5 years.

– World Economic Forum, 2023

3. Internal Mobility is a Top Priority

Companies are prioritizing internal mobility to retain talent and adapt faster.

86%

of HR leaders say internal mobility is a priority.

– LinkedIn, 2024

The time to build capability intelligence is now.
Organizations that act today will build the workforce advantage of tomorrow.

Leaders know course completion, but not capability growth.

We measure activity. Not impact.

WHAT LEADERS KNOW (ACTIVITY)

Learning Activity Dashboard

Courses Completed
1,248 + 18%

Enrolled Learners
2,356 + 22%

Certifications Earned
842 + 16%

Training Hours
8,432 + 20%

Course Completion Rate

Training Trends

Visibility into learning activity is clear and easy.

BUT...

WHAT LEADERS DON'T KNOW (IMPACT)

Capability Growth Dashboard

Skill Improvement ?

Capability Score ?

Job Readiness ?

Business Impact ?

No visibility into capability growth. No clarity on impact.

Are our people actually getting better?
I don't know.

SkillOS bridges the gap between learning activity and real capability growth.

Because what gets measured, gets improved.

Customer Segment

Mid-market companies (500–5000 employees) are the sweet spot.

Big enough to need capability intelligence. Agile enough to adopt and grow with us.

ENTERPRISE
(5000+ employees)

- Complex legacy systems and long sales cycles
- Multiple stakeholders, slower decision making
- High customization needs, higher implementation effort

✕ Hard to land. Slower to scale.

MID-MARKET
(500 – 5000 employees)

- Strong need for **workforce visibility and skill data**
- **Faster decision making** and adoption
- **Focused L&D teams looking for measurable impact**
- High willingness to invest in modern solutions

★ Right need. Right size. Right time.

SMALL / STARTUPS
(< 500 employees)

- Limited budgets and focus on survival
- No dedicated L&D bandwidth
- Low immediate need for **capability measurement**

✕ Not enough need or budget yet.

We win by helping mid-market companies measure, develop, and predict workforce capability.

SkillOS
Measure. Develop. Predict.

Market Opportunity

Massive opportunity in workforce capability and learning analytics.

From tracking learning to driving measurable capability and business impact.

The next frontier of HR Tech

Global Corporate Learning Market (2024)
$370B+
Growing at 9.6% CAGR (2024–2030)

Learning Analytics Market (2024)
$6.1B+
Growing at 23.4% CAGR (2024–2030)

Companies Prioritizing Workforce Skills
87%
of organizations say skills gap is a risk to growth
– Deloitte

Shift to Internal Mobility and Reskilling
2.5X
more likely to hire internally by 2025
– LinkedIn

Large and Growing Market
Corporate Learning Market Size (USD Billion)

Organizations are investing more in learning, but demand is shifting toward outcomes.

Emerging High-Growth Segment
Learning Analytics Market Size (USD Billion)

Learning analytics is the fastest growing segment in the HR Tech ecosystem.

Why Now?

- AI and automation are changing skills requirements rapidly.
- Skills are becoming obsolete 2.5x faster than before.
- Reskilling existing talent is more cost-effective than external hiring.
- Leaders need data-driven insights to plan workforce capability and future readiness.
- Capability intelligence is the missing layer between learning and business outcomes.

Organizations don't just need more training.
They need visibility into capability, growth, and future readiness.

SkillOS by Varud

SkillOS
Measure. Develop. Predict.

PRODUCT VISION

Move from learning metrics to capability intelligence.

SkillOS
Measure. Develop. Predict.

From tracking **what people learn** to understanding **what they can do** and the impact they create.

Impact from capability improvement

Tells you what people can do, and the impact it creates.

Visibility
See real capability across your organization.

Alignment
Align skills to roles, teams and strategy.

Action
Identify gaps and take the right actions.

Impact
Drive performance, growth and ROI.

Future Ready
Build a future-ready workforce with confidence.

SkillOS helps organizations make smarter decisions by turning learning data into **workforce capability intelligence.**

SkillOS
Measure. Develop. Predict.

SOLUTION

Measure, Develop, and Predict workforce capability.

A connected cycle that drives real capability growth and business impact.

1 MEASURE
Understand current capability

Assess skills, identify gaps, and get real-time visibility.

What you get

- Capability assessments across roles and teams
- Capability scores and proficiency levels
- Skill gap analysis at individual and team level
- Real-time dashboards and insights

Team Capability Score

72 /100

Top Skill Gaps

Data Analysis	-18
AI/ML Basics	-15
Communication	-12
Project Management	-10

2 DEVELOP
Build capability that matters

Personalize learning, practice, and on-the-job growth.

What you get

- Personalized learning recommendations
- Curated learning paths for skill growth
- Practice, projects & mentorship opportunities
- Progress tracking and feedback

Your Learning Path

- AI Fundamentals — In Progress
- Data Visualization — Completed
- SQL for Analysis — In Progress
- Real-world Project — Upcoming

3 PREDICT
Anticipate future capability needs

Use AI and data to predict skills, readiness, and business impact.

What you get

- Future skill demand forecasting
- Role and team readiness prediction
- Risk of skill obsolescence alerts
- Workforce planning insights

Future Readiness

85%
Ready for future

High Demand Skills
(Next 12–24 Months)

- AI & Automation ↑
- Data Literacy ↑
- Cybersecurity ↑
- Cloud Computing ↑

Continuous Feedback Loop
Measure progress → Improve → Reassess

Business Impact

- Improved workforce capability and productivity
- Higher ROI on learning investments
- Better talent mobility and retention
- Stronger business agility and future readiness

SkillOS turns learning data into capability intelligence
so organizations can build the right skills, in the right people, at the right time.

SkillOS
Measure. Develop. Predict.

PRODUCT WORKFLOW

From Assessment to Impact

A seamless workflow that turns learning data into workforce capability intelligence.

1 Assessment
Evaluate skills and capture real capability data

2 Capability Graph
Map skills to people, roles, and teams

3 AI Recommendations
Personalize learning, projects, and growth actions

4 Insights
Real-time visibility into capability, gaps, and business impact

Assessment Sources

- **Skill Assessments** — Technical & domain skills
- **Behavioral Assessments** — Soft skills & competencies
- **On-the-Job Performance** — Manager & peer feedback
- **Learning History** — Courses, certifications, paths
- **External Data** — Benchmarks & market data

Output

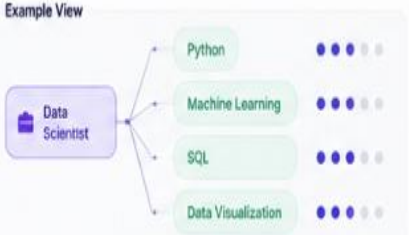

Individual Capability Profile
Skill scores, proficiency levels, and strengths & gaps

Holistic Visibility
See true capability across people, teams, and org.

Data-Driven Decisions
Make smarter talent and L&D investments.

Personalized Growth
Right learning, right time, right impact.

Business Impact
Stronger workforce capability drives business results.

SkillOS
Measure. Develop. Predict.

3-Year Roadmap

Building the Operating System for Workforce Capability

YEAR 1

MEASURE

Build visibility into current capability

GOAL

Create a reliable foundation of capability data across the organization.

KEY INITIATIVES

- Skill & competency framework
- Assessments & proficiency scoring
- Capability graph (v1)
- Team & org dashboards
- Data integrations (HRIS, LMS, ATS)

SUCCESS OUTCOMES

- Unified capability visibility
- Baseline capability scores
- Skill gap identification

YEAR 2

DEVELOP

Drive personalized capability growth

GOAL

Enable continuous learning and development that closes skill gaps and builds capability.

KEY INITIATIVES

- AI-powered learning recommendations
- Personalized learning paths
- Practice labs, projects & simulations
- Mentorship & internal mobility tools
- Capability tracking & progress analytics

SUCCESS OUTCOMES

- Improved capability scores
- Higher learning engagement
- Stronger internal mobility

YEAR 3

PREDICT

Anticipate future capability needs

GOAL

Use AI and analytics to predict skills, readiness, and business impact.

KEY INITIATIVES

- Workforce planning & skill demand forecasting
- Role & team readiness prediction
- Risk of skill obsolescence alerts
- Scenario modeling & what-if analysis
- Business impact analytics & ROI insights

SUCCESS OUTCOMES

- Future-ready workforce
- Reduced skill risk & gaps
- Measurable business impact

End Vision: The intelligent layer that powers workforce decisions across learning, talent, and business outcomes.

FOUNDATION (YEARS 1–3)

- Secure & scalable platform
- AI/ML engine & data pipeline
- Open integrations & APIs
- Privacy, security & compliance
- Continuous feedback & iteration

SkillOS
Measure. Develop. Predict.

BUSINESS MODEL

Per Employee SaaS Subscription with Enterprise Expansion

Simple, scalable, and aligned with customer success.

Core Model: Per Employee SaaS Subscription

We charge a per employee, per year (or per month) subscription for access to the full SkillOS platform.

Subscription Tiers (Example)

Essentials
$4
per employee / month
- Skill Assessments
- Capability Scores
- Team Dashboards
- Basic Reports

Growth
$7
per employee / month
- Everything in Essentials
- AI Recommendations
- Learning Paths
- Advanced Analytics

Enterprise
Custom
per employee / month
- Everything in Growth
- Workforce Planning
- Predictive Insights
- Dedicated Success Manager
- Custom Integrations & SSO

Enterprise Expansion Strategy

Start with one team or business unit. Expand across the organization.

Start Small
Pilot with a team or department

→

Prove Value
Demonstrate capability improvement & ROI

→

Expand
Roll out to more teams, functions, or locations

→

Scale Enterprise-wide
Become the system of record for capability

Enterprise Value Drivers

- Better visibility into workforce capabilities
- Higher learning ROI and productivity
- Stronger talent mobility and retention
- Future-ready workforce and business agility

Revenue Model
Predictable, scalable, and aligned with customer growth.

- Revenue grows as customers grow
- Expansion driven by measurable outcomes
- High retention through long-term value delivery

SkillOS
Measure. Develop. Predict.

OUR MOATS

Built for depth. Designed to win.

Sustainable advantages that compound over time.

1. Capability Data Moat

Richer data. Deeper insights.
Stronger moat.

Proprietary, longitudinal capability data across skills, roles, teams, and outcomes.

- Unique, first-party capability graph
- Longitudinal data across the employee lifecycle
- Continuously grows in richness and depth
- Hard to replicate, easy to compound

2. Benchmarking Moat

Built-in benchmarks that create unmatched context.

Industry, role, team, and organization benchmarks drive better decisions.

Example: Data Analyst Benchmark
(Mid-market Companies)

Your Score **72**

+14 Above Benchmark

Benchmark **58**

- Crowdsourced, anonymized benchmark data
- Contextual insights that improve with scale
- Increases value as the network grows
- Hard to build without critical mass

3. AI Recommendations Moat

Smarter recommendations.
Better outcomes. Higher lock-in.

AI gets smarter with more data, feedback, and real-world outcomes.

- Personalized learning paths based on capability gaps
- Project & practice recommendations that build real skills
- Mentorship & expert matching that accelerates growth
- Outcomes improve and AI models get stronger over time

- Proprietary models trained on capability data
- Feedback loop improves every recommendation
- Drives higher engagement and outcomes
- Hard to replicate, even with data

4. Integrations Moat

Embedded in the workflow.
Harder to replace.

Deep integrations across the tools companies use every day.

Workday	SAP SuccessFactors	BambooHR
Microsoft Teams	Slack	Google Workspace
LMS (Cornerstone, Docebo)	HRIS (ADP, UKG, Oracle)	SSO (Okta, Azure AD)
APIs & Webhooks		

- Fits into existing systems and workflows
- Becomes part of the daily operating rhythm
- Higher switching costs over time
- Extensible platform for ecosystem growth

These moats reinforce each other.
The more we grow, the stronger we become.

More Data → Better Benchmarks → Smarter AI → Deeper Integrations → Stronger Moat

GO-TO-MARKET

Land one team, prove ROI, expand company-wide.

A proven land-and-expand motion that drives results and scales impact.

1

Land One Team (Beachhead)

- Start with a motivated leader and a high-impact team
- Assess capabilities and identify critical gaps
- Deliver quick wins and clear value

Goal: Establish value and credibility

2

Prove ROI (Expand)

- Show measurable improvements in skills, productivity, and business outcomes
- Build a success story and internal champions
- Refine and standardize the approach

Goal: Demonstrate ROI and repeatability

3

Expand Company-Wide (Scale)

- Roll out to more teams, functions, and locations
- Integrate into learning, talent, and business processes
- Drive a culture of continuous capability growth

Goal: Scale impact across the organization

Start small. Prove big. Scale fast.
Turn capability intelligence into a **sustainable competitive advantage.**

SkillOS

Measure. Develop. Predict.

SkillOS – The Future of Workforce Capability

Turning workforce potential into **measurable performance** and **business impact.**

Measure

See true capability across people, teams, and the organization.

Develop

Close skill gaps and accelerate growth with personalized experiences.

Predict

Anticipate future needs and make smarter, faster workforce decisions.

Transform

Drive business impact with a future-ready, adaptive workforce.

Built for every organization that invests in people.

- **Mid-Market** — 500 – 5,000 Employees
- **High-Growth** — Scaling Teams
- **Future-Ready** — Enterprises
- **Global Impact** — Across Industries

Better visibility. Smarter decisions. Stronger organizations.

The future of work starts with capability intelligence.

Let's build a better, more capable future – together.
