PART 1 · MODULE B

Data entry, validation and quality control

Accurate records, checked before they are saved.

B1. Data entry

Copy information accurately from a source into a system. Quality matters more than speed: a wrong phone number costs more than a slow hour.

B2. Validation before entry

Check each record before saving: required fields, valid email, a 10-digit phone number after removing the country code. The tested validator below returns the list of problems for a record.

PYTHON

```
import re

def clean_phone(raw):
    digits = re.sub(r"\D", "", raw)
    if digits.startswith("91") and len(digits) == 12:
        digits = digits[2:]
    return digits if len(digits) == 10 else None

def valid_email(raw):
    return bool(re.fullmatch(r"[^@\s]+@[^@\s]+\.[^@\s]+", raw.strip()))

def validate_record(rec):
    errors = []
    if not rec.get("name", "").strip():
        errors.append("name missing")
    if not valid_email(rec.get("email", "")):
        errors.append("email invalid")
    if clean_phone(rec.get("phone", "")) is None:
        errors.append("phone must be 10 digits (after removing +91)")
    return errors

def reconcile(bank, ledger):
    """Match bank lines to ledger entries by amount and date. Returns matched, unmatched_bank,
unmatched_ledger."""
    remaining = list(ledger)
    matched, unmatched_bank = [], []
    for b in bank:
        hit = next((l for l in remaining if l["amount"] == b["amount"] and l["date"] ==
b["date"]), None)
        if hit:
            matched.append((b["id"], hit["id"])); remaining.remove(hit)
        else:
            unmatched_bank.append(b["id"])
    return matched, unmatched_bank, [l["id"] for l in remaining]

print(clean_phone('+91 98765-43210'))          # 9876543210
print(validate_record({'name':'','email':'bad','phone':'123'}))
```

B3. Scam awareness

Be suspicious of job offers that ask you to pay to start, to buy a kit, or to share bank or card details before a contract. Never share one-time passwords. Verify the employer through its official website before replying.
