PART 1 · MODULE C

Bookkeeping, reconciliation and QuickBooks

Records, reconciliation and the boundaries of the work.

C1. Accounting basics

Bookkeeping records every transaction: invoices, payments, expenses. Accounts payable is money you owe; accounts receivable is money owed to you. Financial statements summarise the position.

C2. Bank reconciliation (tested)

Reconciliation matches bank lines to the ledger. Unmatched items are investigated. The tested matcher below pairs items by date and amount.

PYTHON

```
import re

def clean_phone(raw):
    digits = re.sub(r"\D", "", raw)
    if digits.startswith("91") and len(digits) == 12:
        digits = digits[2:]
    return digits if len(digits) == 10 else None

def valid_email(raw):
    return bool(re.fullmatch(r"[^@\s]+@[^@\s]+\.[^@\s]+", raw.strip()))

def validate_record(rec):
    errors = []
    if not rec.get("name", "").strip():
        errors.append("name missing")
    if not valid_email(rec.get("email", "")):
        errors.append("email invalid")
    if clean_phone(rec.get("phone", "")) is None:
        errors.append("phone must be 10 digits (after removing +91)")
    return errors

def reconcile(bank, ledger):
    """Match bank lines to ledger entries by amount and date. Returns matched, unmatched_bank,
unmatched_ledger."""
    remaining = list(ledger)
    matched, unmatched_bank = [], []
    for b in bank:
        hit = next((l for l in remaining if l["amount"] == b["amount"] and l["date"] ==
b["date"]), None)
        if hit:
            matched.append((b["id"], hit["id"])); remaining.remove(hit)
        else:
            unmatched_bank.append(b["id"])
    return matched, unmatched_bank, [l["id"] for l in remaining]

bank=[{'id':'B1','date':'2026-03-01','amount':1200},{'id':'B2','date':'2026-03-02','amount':800}]
ledger=[{'id':'L1','date':'2026-03-01','amount':1200},{'id':'L2','date':'2026-03-
02','amount':900}]
print(reconcile(bank, ledger))   # matched B1-L1; B2 and L2 need investigation
```

C3. QuickBooks Online

QuickBooks is accounting software. Typical work: set up the company, connect the bank feed, categorise transactions, send invoices, and reconcile. Check the current QuickBooks help pages for the

steps in your region.

C4. Boundaries of this work

IMPORTANT

Bookkeeping records transactions. It is not regulated accounting, audit or tax advice. Filing returns and tax decisions belong to a qualified chartered accountant or tax professional in the relevant country. Say so in your proposal and do not give tax advice.

VERIFICATION NOTE

Software features, plans, fees and legal rules change. Links point to official sites that were not checked live in this draft. Confirm tax, payment, telemarketing and data-protection rules with the official government or regulator pages, or with a qualified professional, before relying on them.
