DEPARTMENT 1 · DEVELOPMENT AND IT · PROFESSION 10

Project coordinator

Profession 10 of 10 in Development and IT.

What the profession means

A project coordinator keeps a project on track: the schedule, tasks, risks, meetings and status reports. The coordinator does not own the decisions; they make sure the right people make them on time.

What professionals do every day

Keeps the task board current, runs short check-ins, tracks risks and dependencies, and writes weekly status reports.

Why businesses hire them, and what problems they solve

Projects fail quietly when nobody tracks the small things. A coordinator makes problems visible early.

- Tasks with no owner or due date.
- Risks noticed too late.
- Status reports nobody reads.

Skills you need

- Planning and scheduling.
- Risk logs.
- Clear meeting notes.
- Stakeholder communication.

Tools (free and paid)

Tool	What it is for	Free option	Paid option	Official link (not checked live)
Trello	Task boards	Free tier	Paid plans	trello.com
Asana	Task and project tracking	Free tier	Paid plans	asana.com
Microsoft 365	Outlook, Excel, Word, Teams	Free web apps	Paid plans	www.microsoft.com/microsoft-365

Learning sequence: beginner, intermediate, advanced

Level	What you can do when you finish
Beginner	Build a task board with owners and due dates.
Intermediate	Start a risk log with three risks and mitigations.
Advanced	Write a one-page weekly status report.

Projects by level

- **Beginner:** Website launch coordination.
- **Intermediate:** Event planning for a training firm.

- **Advanced:** Product release tracking.

Client-ready portfolio project

A coordination pack for a fictional launch: a task board, a risk log with three risks and a weekly status report.

Worked example

Worked example. A supplier is two days late. The coordinator adds it to the risk log with an owner, a mitigation and a date, and flags it in the status report with the decision needed.

Assignment with full solution

ASSIGNMENT

Weekly status report

Business problem: A launch team needs a clear weekly update for the sponsor.

Steps

1. List the tasks completed, in progress and late, each with an owner.
2. List the top three risks with mitigation and owner.
3. Name one decision needed from the sponsor.
4. Send by a fixed time each week.

Expected output: The one-page report.

SOLUTION (ANSWER KEY)

A fixed format with owners and one clear decision needed makes the report quick to read and act on.

Common mistakes

- Owners named as 'team'.
- Status reports that hide late tasks.
- Meetings with no notes or actions.
- Tracking everything and reviewing nothing.

Freelancing opportunities

- Coordination for launches, events and small projects.
- Task board and risk-log set-up.
- Briefs for 'project coordinator', 'project management', 'task tracking'.
