How to use this textbook

This textbook teaches AI and Automation from absolute zero to freelance-ready. It follows the same structure as the Development and IT textbook, and links to it where skills overlap.

Who it is for

School students (supervised), college students, graduates, working professionals, career changers, freelancers and small business owners.

Safety and responsibility

- Never put personal, customer or medical data into a public AI tool unless its data terms allow it.
- Every AI output is a draft. A human checks facts, numbers and promises before anything reaches a customer.
- Automations that send messages or money need an approval step first.

VERIFICATION NOTE

Tool names, features, plan names and prices change often. The links below point to official sites but were not checked live in this session. Confirm each one before you rely on it or quote it to a client.

Part of **Master Freelancing: AI and Automation**. Back to the chapter list on skillnavora.in · Open the full textbook. Official links in this chapter were not checked live; confirm before relying on them.
