PART 1 · MODULE F

Invoicing, payments and tax basics

Money rules vary; always verify officially.

F1. Getting paid

- Invoice with number, date, description, amount, due date and payment details.
- Take a deposit before starting.
- Use the marketplace's payment system where its terms require it.
- For international clients, check the bank or payment service's fees and conversion rate.

F2. Records

Keep invoices, contracts, receipts and bank statements in one folder per year.

F3. Tax and registration (check officially)

Freelancers usually must report income and may need registration depending on turnover and the services sold. Rules differ by country and change. For India, start with the official portals and a qualified chartered accountant:

- incometax.gov.in
- gst.gov.in
- rbi.org.in (foreign exchange rules)

IMPORTANT

This book does not state tax rates, thresholds or filing rules. Confirm them on the official portals or with a qualified professional.
