Lesson 6.1: User research, wireframing, information architecture and usability testing

What you learn

- **Research.** Interview real users to learn goals and problems.
- **Wireframes.** Low-fidelity layouts that test structure before visual design.
- **Information architecture.** How content is grouped and labelled; test with card sorting.
- **Usability testing.** Watch five people try tasks and note where they struggle; Maze and Figma prototypes support remote tests.

ASSIGNMENT

Practice for lesson 6.1

Business problem: Test a prototype.

Steps

1. Write three tasks.
2. Test with five people.
3. List the problems by severity.

Expected output: A prioritised problem list.

SOLUTION (ANSWER KEY)

If three of five fail the same step, fix it first.

Check yourself

1. Why test with real users?
   Answer: Designers cannot see their own blind spots.
2. What does information architecture decide?
   Answer: Grouping and labels.
