Lesson 6.1: Webflow box model, responsive layouts and Client-First naming

What you learn

- **Box model.** Content, padding, border, margin. Webflow shows them in the style panel.
- **Responsive layouts.** Design for desktop then adjust breakpoints; test on real phones.
- **Client-First.** A naming system with consistent class names (for example section_ and u- utilities) so any teammate can edit the project.

- Webflow University
- Client-First

ASSIGNMENT

Practice for lesson 6.1

Business problem: Build a landing section.

Steps

1. Create a section with a container.
2. Name the classes by the system.
3. Check tablet and phone breakpoints.

Expected output: A section that behaves on three sizes.

SOLUTION (ANSWER KEY)

Consistent names make the project easy to hand over.

Check yourself

1. What does Client-First solve?
   Answer: Messy, hard-to-maintain class names.
2. What do you test at the end?
   Answer: Every breakpoint.
