Lesson 10.1: Visual database modelling, privacy rules, API Connector and plugins

What you learn

- **Data types.** Model things (User, Order) with fields and relationships.
- **Privacy rules.** Control who can find and see each type. Set them first; the default can expose data.
- **API Connector.** Call outside APIs with set headers and parameters; keep keys private.
- **Plugins.** Use trusted plugins and consider writing your own for repeated needs.

ASSIGNMENT

Practice for lesson 10.1

Business problem: Lock down a data type.

Steps

1. Create an Order type.
2. Add a rule: only the owner can find and view.
3. Test as another user.

Expected output: Another user sees nothing.

SOLUTION (ANSWER KEY)

Privacy rules apply to searches and direct access. Always test with a second account.

Check yourself

1. Why set privacy rules early?
   Answer: Data can be exposed by default.
2. Where do API keys go?
   Answer: In private fields of the API Connector.
