SkillNavora Academy · Chapter 7 of 19

YouTube Marketing

Lectures 7.1 to 7.17, a changeable sequence, Claude prompts for automatic content, and how to connect Claude to YouTube

Written by Varun, for SkillNavora · Draft

Official site: www.skillnavora.in

Prepared for Skillnavora — Learn. Practise. Implement. Grow.

CHAPTER 7 · YOUTUBE MARKETING · OVERVIEW

YouTube Marketing

Lectures 7.1 to 7.17, a changeable learning sequence, how to make YouTube content with Claude from one prompt, and how to connect Claude to YouTube safely.

What you will learn

- How YouTube finds and suggests videos, and how to set up a channel.
- Free tools, honest growth methods and three channel strategies.
- Video gear, recording and editing, and how to pick ideas from competitors and keywords.
- YouTube SEO, thumbnails, banners, cards, end screens, comments and community.
- Earning rules, analytics, and a capstone plan with one published video.
- How to draft a full video package with Claude from one prompt, and how to connect Claude to YouTube with a human review step.

How this chapter is built

Each lecture follows the same pattern: learning objective, lesson, practice, a knowledge check with answers, key takeaways and a completion checklist. The pillars (Understand, Create, Implement, Optimise, Apply) show what each lecture trains.

SKILLNAVORA DEMONSTRATION PROJECT

Use one channel idea as your running project. Work through lectures 7.1 to 7.17 on that one channel, so by the end you have a channel, a video package and a 90-day plan.

VERIFY FIRST (TIME-SENSITIVE)

YouTube's official pages could not be reached while this guide was written, so every figure, limit, policy and menu name below must be checked on the official page before you act on it. Official starting points: youtube.com/howyoutubeworks, support.google.com/youtube, studio.youtube.com (Help inside Studio), and developers.google.com/youtube/v3.

Author: Varun. Prepared for Skillnavora — Learn. Practise. Implement. Grow.

Change the sequence of lectures

You do not have to follow the default order. Use the dependency column to see what must come first, then choose a path or make your own.

Default order and dependencies

Default no.	Lecture	Pillar	Dependency (why it sits here)
7.1	YouTube marketing overview	Understand	Start here. Everything else depends on it.
7.2	Create a YouTube channel	Implement	Needed before any upload.
7.3	The best free YouTube tools	Implement	Choose tools before you record.
7.4	Grow subscribers: honest methods	Optimise	Can move later; apply it to your first videos.
7.5	Three simple channel strategies	Create	Decide the format before you make ideas.
7.6	Video gear	Implement	Can move before recording.
7.7	Record and edit your first video	Implement	Needs 7.5 and 7.6.
7.8	Video ideas with competitor analysis	Create	Can move earlier if you need ideas fast.
7.9	Video ideas with keyword research	Create	Can run alongside 7.8.
7.10	YouTube SEO	Optimise	Put after your first draft, before upload.
7.11	Custom thumbnails	Create	Needs a finished title (7.10).
7.12	Channel banner and profile picture	Create	Can move earlier, during channel setup (7.2).
7.13	Cards and end screens	Implement	Needs a published or private video.
7.14	Comments and community	Optimise	Needs an uploaded video.
7.15	Monetisation and sponsorships	Apply	Move later, after you have audience data.
7.16	Analytics: retention and CTR	Optimise	Needs 48 hours of data from a video.
7.17	Capstone assignment	Apply	Always last.

Three ready-made paths

Path	Order you follow	Best for
Beginner path (default)	7.1, 7.2, 7.3, 7.5, 7.6, 7.7, 7.8, 7.9, 7.10, 7.11, 7.12, 7.13, 7.4, 7.14, 7.16, 7.15, 7.17	First channel, no audience yet
Launch-fast path	7.1, 7.2, 7.12, 7.3, 7.5, 7.8, 7.9, 7.6, 7.7, 7.10, 7.11, 7.13, 7.14, 7.16, 7.4, 7.15, 7.17	Need to publish within two weeks
Growth path (existing channel)	7.16, 7.8, 7.9, 7.10, 7.11, 7.13, 7.4, 7.14, 7.5, 7.15, 7.12, 7.7, 7.17	Channel already has videos; fix analytics first

Rules for your own order

- Keep 7.1 first and 7.17 last in every path.

- Never move a lecture before the one it depends on (see the table).
- If you move a lecture, write the new order in your workbook and keep it for at least 30 days before you change again.
- Replace any lecture you already know with the capstone task for that topic.

MAKE YOUR OWN PATH

Copy the table into a spreadsheet. Add a column called "My order" with numbers 1 to 17. Sort by that column. Check each dependency again. The Skillnavora Chapter 7 interactive planner does the same with buttons.

Make YouTube content from one Claude prompt

Claude can draft most of a video package: titles, description, script, thumbnail ideas, tags, pinned comment and a calendar. You still record, check facts and approve every video.

The workflow in six steps

1. Choose one topic and one viewer problem.
2. Send Prompt A (below) with your details filled in.
3. Check every claim, number and date yourself; remove anything you cannot prove.
4. Record the video. Speak in your own words; do not read the script word for word.
5. Upload as private in YouTube Studio, watch it once, then publish.
6. Use Analytics (lecture 7.16) to decide the next prompt.

Prompt A: full video package

PROMPT A

```
You are my YouTube producer. My channel is about [topic] for [audience]. My goal is [goal, e.g. leads for my service].
My video format is [educate / show / connect] and the video length is [6-8 minutes].
Task: write one complete video package.
1. Five title options (under 70 characters, honest, no false promises).
2. A description: first two lines explain the video; then a timestamp list with chapters; then a call to action.
3. A 30-second hook, then a script with three main points and an ending. Mark where B-roll or screen recording should go.
4. Five thumbnail text ideas (three to five words each) and one visual idea for each.
5. Ten tags, and a list of five related keywords from search suggestions I should check myself.
6. A pinned comment and two reply templates for common questions.
7. A checklist of claims I must verify before publishing (numbers, prices, dates, policies).
Do not invent statistics, testimonials or results. Use simple English.
```

Prompt B: 30-day calendar

PROMPT B

```
Make a 30-day content calendar for my channel on [topic].
Give one video per week with: working title, main keyword, format, the viewer problem it solves, and the next video it leads to.
Vary the format. Avoid repeating the same title pattern twice. Flag any idea that might copy an existing video, and make it original.
```

Prompt C: review a draft script

PROMPT C

```
Review this draft script for my video. Check: is the hook clear in the first 15 seconds; does each point answer one question; are there claims that need a source; is the ending a single next step; is the length right for the topic.
Give me a list of fixes in priority order. Do not rewrite the whole script.
```

WATCH OUT

Do not publish AI output without review. Do not make many near-identical videos from one prompt; YouTube's rules on repetitious and mass-produced content and on disclosing realistic altered or synthetic content can apply. Check the current policy pages before you scale.

VERIFY FIRST (TIME-SENSITIVE)

YouTube's official pages could not be reached while this guide was written, so every figure, limit, policy and menu name below must be checked on the official page before you act on it. Official starting points: youtube.com/howyoutubeworks, support.google.com/youtube, studio.youtube.com (Help inside Studio), and developers.google.com/youtube/v3.

Connect Claude to YouTube

There are three levels. Start with level 1. Move to level 2 or 3 only when you have a reason and a review step.

Level 1: copy and paste (safest, no setup)

Use Prompts A to C above. Paste the output into YouTube Studio yourself. This is the right choice for most creators.

Level 2: connector or tool inside Claude

Some Claude plans offer connectors and tools. Check what is available in your Claude settings, and read what data each connector can read or change before you turn it on. If a YouTube connector is listed, use it to read analytics or draft metadata. Do not let it publish without your approval.

Level 3: YouTube Data API v3 with your own script

The YouTube Data API lets a program read channel data and upload videos. You need a Google Cloud project, the YouTube Data API enabled, an OAuth consent screen and OAuth client credentials. Steps:

1. Create a Google Cloud project and enable the YouTube Data API v3.
2. Set the OAuth consent screen. Add yourself as a test user.
3. Create OAuth client credentials (desktop app) and download the JSON file. Keep it private; never put it in a public repository.
4. Request only the scopes you need, for example upload and read-only access.
5. Write a script that: (a) asks Claude for the package with Prompt A, (b) saves it to a text file, (c) waits for your written approval, (d) uploads the video as private.
6. Only after you check the private upload, change it to public in Studio or with an approved request.

IMPORTANT LIMITS

Uploads made through an API project that has not passed YouTube's audit are often restricted to private viewing. Check the API audit and quota pages before you plan a public launch. Each API project has a daily quota; uploads cost much more quota than reads. Confirm the current cost and default quota on the API documentation before you build a schedule.

Safe automation rules

- Human approval before every upload and every public change.
- Store keys and OAuth files outside the video folder. Never paste them into a chat.
- Log every prompt, output and upload so you can trace mistakes.
- Keep a list of claims to verify, and tick each one before publishing.
- Stop the script if an upload fails twice; do not keep retrying.

VERIFY FIRST (TIME-SENSITIVE)

YouTube's official pages could not be reached while this guide was written, so every figure, limit, policy and menu name below must be checked on the official page before you act on it. Official starting points: youtube.com/howyoutubeworks, support.google.com/youtube, studio.youtube.com (Help inside Studio), and developers.google.com/youtube/v3.

LECTURE 7.1 · PILLARS: UNDERSTAND

YouTube marketing overview

Understand why YouTube matters for a business and how it differs from other channels.

Learning objective

Understand why YouTube matters for a business and how it differs from other channels.

YouTube is the second-largest search engine in many markets. Videos can be found by search, suggested in the Home feed and Shorts feed, and shared outside YouTube. A video keeps working for months, not hours.

- Search: people type a question and open a video that answers it.
- Suggested: YouTube recommends videos based on what a viewer watches.
- Shorts: short vertical videos with a separate feed.
- Browse and external: links from your website and social posts.

VERIFY FIRST (TIME-SENSITIVE)

Platform figures change. Do not quote audience numbers without a current source. Read YouTube's own research and Creator Academy pages.

Practice

Pick three channels in your niche. Note their search, suggested and Shorts presence.

KNOWLEDGE CHECK

1. Why does a video keep working for months?
   Answer: Search and suggested traffic keep finding it.
2. Name two ways viewers find videos.
   Answer: Search, suggested feed, Shorts, external links.

Key takeaways

- YouTube is a search and discovery platform.
- Plan for long-term value.
- Use several discovery routes.

Completion checklist

Done	Item
☐	I can name four ways people find videos.
☐	I picked three channels to study.

LECTURE 7.2 · PILLARS: IMPLEMENT

Create a YouTube channel (personal or brand)

Set up a channel with the right account type and a clear name.

Learning objective

Set up a channel with the right account type and a clear name.

- Sign in with a Google account and open YouTube Studio.
- Choose a personal channel name or create a brand account for a business, so more than one person can manage it.
- Set a clear channel name, handle and description that match your website.
- Turn on two-step verification on the Google account.

Brand accounts suit businesses and teams. A personal channel suits one creator. You can add managers to a brand account in settings.

VERIFY FIRST (TIME-SENSITIVE)

Account names, menu locations and handle rules change. Check YouTube Help: support.google.com/youtube

Practice

Create a channel draft. Write the name, handle and a two-sentence description.

KNOWLEDGE CHECK

1. What does a brand account allow?
   Answer: Several managers under one channel.
2. Why use two-step verification?
   Answer: To protect the Google account.

Key takeaways

- Pick the account type that fits.
- Match name and description to your website.
- Protect the account.

Completion checklist

Done	Item
☐	Channel created or drafted.
☐	Description written.
☐	Two-step verification on.

LECTURE 7.3 · PILLARS: IMPLEMENT

The best free YouTube tools

Choose free tools for research, editing and thumbnails, and know their limits.

Learning objective

Choose free tools for research, editing and thumbnails, and know their limits.

- YouTube Studio: uploads, analytics, comments and basic editing (free).
- YouTube Creator Academy: free lessons from YouTube (check the current course list).
- Canva: thumbnails and banners (free and paid tiers).
- CapCut or DaVinci Resolve: editing (free versions; check their current terms).
- Keyword and idea tools: many have free and paid plans; check limits before relying on them.

WATCH OUT

Do not pay for a tool before you have a plan. Free tools are enough to publish your first ten videos.

Practice

List three free tools you will use this month and what each does for you.

KNOWLEDGE CHECK

1. Which YouTube tool is built in and free?
   Answer: YouTube Studio.
2. Why check tool limits?
   Answer: Free plans often limit exports, searches or data.

Key takeaways

- YouTube Studio covers the basics.
- Free editors are enough to start.
- Check limits before you commit.

Completion checklist

Done	Item
☐	Three free tools chosen.
☐	Limits noted.

LECTURE 7.4 · PILLARS: OPTIMISE

Grow subscribers: honest methods

Grow subscribers with useful videos, not with unrealistic promises.

Learning objective

Grow subscribers with useful videos, not with unrealistic promises.

- Make one clear promise per video in the first 15 seconds.
- Ask viewers to subscribe only after they have received value.
- Use playlists so a new viewer can watch several videos.
- Post on a schedule you can keep.

WATCH OUT

Headlines that promise huge growth, for example a 400 percent increase, are not a method. Do not copy such claims. Use results you can prove.

Practice

Write a first-15-seconds script for one video with a single promise.

KNOWLEDGE CHECK

1. When should you ask for a subscription?
   Answer: After the viewer has received value.
2. What is a playlist for?
   Answer: Keeping viewers watching several of your videos.

Key takeaways

- One promise per video.
- Ask after value.
- Build playlists.

Completion checklist

Done	Item
☐	Promise written.
☐	Schedule planned.

LECTURE 7.5 · PILLARS: CREATE

Three simple channel strategies

Pick one of three strategies that fits your business and stick to it for 90 days.

Learning objective

Pick one of three strategies that fits your business and stick to it for 90 days.

1. Educate: how-to videos that answer one question each.
2. Show: behind-the-scenes or product demos.
3. Connect: interviews, reviews or customer stories.

Choose one as your main format and one as a support format.

Practice

Choose your main strategy and write three video titles that fit it.

KNOWLEDGE CHECK

1. How many main strategies should you choose?
   Answer: One main format.
2. Which strategy suits a service business?
   Answer: Educate or connect, depending on the audience.

Key takeaways

- Choose one main format.
- Keep the format for 90 days.
- Measure before changing.

Completion checklist

Done	Item
☐	Strategy chosen.
☐	Three titles written.

LECTURE 7.6 · PILLARS: IMPLEMENT

Video gear: what to start with

Choose basic gear you can afford and use it well.

Learning objective

Choose basic gear you can afford and use it well.

- A phone with a good rear camera, held steady, facing a window for light.
- A small clip-on or desk microphone for clear voice.
- A tripod or stable stand.
- Simple lighting, such as a window or a desk lamp.

TIP

Clear sound matters more than fancy cameras. Record a 30-second test and listen with headphones before you start.

Practice

Record a 30-second test with your phone and microphone. Note what to fix.

KNOWLEDGE CHECK

1. What matters most for a first video?
   Answer: Clear sound and steady light.
2. Why record a test?
   Answer: To find problems before the real video.

Key takeaways

- Start with what you have.
- Sound first.
- Test before filming.

Completion checklist

Done	Item
☐	Test clip recorded.
☐	Gear list made.

LECTURE 7.7 · PILLARS: IMPLEMENT

Record and edit your first video

Record and edit a simple video from start to finish.

Learning objective

Record and edit a simple video from start to finish.

1. Write a short script with a hook, three points and an ending.
2. Film in short takes; keep the best take.
3. Import into an editor and cut pauses and mistakes.
4. Add titles and captions where they help.
5. Export at 1080p, check sound and the first 30 seconds, then upload.

Upload as a private video first, watch it all the way through, then publish.

Practice

Record and edit a two-minute video. Upload it as private and watch it once.

KNOWLEDGE CHECK

1. Why upload as private first?
   Answer: To check the video before the public sees it.
2. What should the first 30 seconds do?
   Answer: Hook the viewer with a clear promise.

Key takeaways

- Script, film, cut, export.
- Check the first 30 seconds.
- Private check before publishing.

Completion checklist

Done	Item
☐	Video edited.
☐	Private check done.

LECTURE 7.8 · PILLARS: CREATE

Video ideas with competitor analysis

Find video ideas that have already worked for others, then make a better version.

Learning objective

Find video ideas that have already worked for others, then make a better version.

- Search your topic on YouTube and note the top ten videos.
- Sort by view count in the filter and note the date of each.
- Look at the comments: what do viewers ask for?
- Make a better version: newer, clearer, or more specific.

WATCH OUT

Copy ideas, not content. Do not reuse another creator's script, footage or thumbnail.

Practice

List ten competitor videos for one topic and write one improvement for each.

KNOWLEDGE CHECK

1. What should you copy from a competitor video?
   Answer: The topic idea, not the content.
2. Where do viewer requests appear?
   Answer: In the comments.

Key takeaways

- Study what works.
- Improve, do not copy.
- Comments show demand.

Completion checklist

Done	Item
☐	Ten videos listed.
☐	Improvements written.

LECTURE 7.9 · PILLARS: CREATE

Video ideas with keyword research

Use search demand to choose video topics.

Learning objective

Use search demand to choose video topics.

- Type a seed topic in the YouTube search bar and note autocomplete suggestions.
- Use a keyword tool to check search volume ranges and competition (free and paid options exist).
- Group keywords into topics and pick one video per topic.
- Prefer specific questions that match a clear viewer need.

VERIFY FIRST (TIME-SENSITIVE)

Keyword tool data is an estimate. Check results in YouTube search yourself.

Practice

Collect 30 keyword ideas from autocomplete and group them into five video topics.

KNOWLEDGE CHECK

1. What does autocomplete show?
   Answer: Popular searches related to your seed term.
2. Why group keywords?
   Answer: One video should target one clear topic.

Key takeaways

- Start with autocomplete.
- Group into topics.
- One video per topic.

Completion checklist

Done	Item
☐	30 ideas collected.
☐	Five topics chosen.

LECTURE 7.10 · PILLARS: OPTIMISE

YouTube SEO: rank videos higher

Make titles, descriptions, captions and chapters clear so YouTube understands the video.

Learning objective

Make titles, descriptions, captions and chapters clear so YouTube understands the video.

- Title: include the main keyword near the start; be specific and honest.
- Description: explain the video in the first two lines; add links and a timestamp list.
- Chapters: timestamps in the description help viewers jump and help YouTube understand the parts.
- Captions: upload a caption file or use auto-captions, then correct errors.
- Tags: optional; a few relevant ones are enough. Tags do not replace good titles.

VERIFY FIRST (TIME-SENSITIVE)

YouTube SEO guidance evolves. Check the current YouTube Help pages on titles, descriptions and chapters before you rely on exact rules.

Practice

Write title, description and chapter timestamps for your test video.

KNOWLEDGE CHECK

1. Are tags the main ranking factor?
   Answer: No. Titles, relevance and viewer satisfaction matter more.
2. Why add chapters?
   Answer: They help viewers jump and show structure.

Key takeaways

- Specific honest titles.
- Descriptions explain the video.
- Captions help everyone.

Completion checklist

Done	Item
☐	Title and description written.
☐	Captions checked.

LECTURE 7.11 · PILLARS: CREATE

Custom thumbnails

Design thumbnails that show the promise clearly and honestly.

Learning objective

Design thumbnails that show the promise clearly and honestly.

- Use a clear face or object, large text (three to five words) and high contrast.
- Match the thumbnail to the video; misleading thumbnails harm trust and can break policy.
- Typical file: 1280 by 720 pixels, 16:9, under 2 MB (check current limits in YouTube Studio).
- Custom thumbnails need the channel to be eligible: check verification and channel status in Studio.

VERIFY FIRST (TIME-SENSITIVE)

Custom thumbnail eligibility and file limits are set by YouTube and can change. Check Studio and the YouTube Help Center.

Practice

Design two thumbnails for one video and compare them with a 1-second look test.

KNOWLEDGE CHECK

1. What should a thumbnail match?
   Answer: The video's real content.
2. What is a typical thumbnail ratio?
   Answer: 16:9.

Key takeaways

- Clear, honest thumbnails.
- Check file limits.
- Test two designs.

Completion checklist

Done	Item
☐	Two thumbnails made.
☐	Eligibility checked.

LECTURE 7.12 · PILLARS: CREATE

Channel banner and profile picture

Set up a channel banner and profile picture that look right on every device.

Learning objective

Set up a channel banner and profile picture that look right on every device.

- Profile picture: a clear square logo or photo (commonly 800 by 800 pixels; check current guidance).
- Banner: keep key text in the central safe area, because devices crop the banner differently (commonly around 1546 by 423 pixels in the centre; check).
- Add links to your website and social profiles in channel customisation.

VERIFY FIRST (TIME-SENSITIVE)

Banner and profile sizes are published in YouTube Help and can change. Check the current guidance before you design.

Practice

Design a banner and check how it looks on a phone and a desktop preview.

KNOWLEDGE CHECK

1. Where should key banner text go?
   Answer: In the central safe area.
2. Why add links?
   Answer: To send viewers to your website.

Key takeaways

- Square profile picture.
- Banner text in the safe area.
- Links in customisation.

Completion checklist

Done	Item
☐	Profile picture set.
☐	Banner checked on two devices.

LECTURE 7.13 · PILLARS: IMPLEMENT

Cards and end screens

Use cards and end screens to send viewers to the next video.

Learning objective

Use cards and end screens to send viewers to the next video.

- Cards: small clickable prompts that appear during a video. Add them in Studio at the right moment.
- End screens: up to a few elements shown in the last seconds. End screens need a video that is long enough (check the current minimum length in Help).
- Pick one next step per video: a playlist or a related video.

VERIFY FIRST (TIME-SENSITIVE)

Minimum video length for end screens and card rules can change. Check the YouTube Help Center.

Practice

Add one end screen element and one card to your test video. Save as a draft.

KNOWLEDGE CHECK

1. Where do end screens appear?
   Answer: In the final seconds of the video.
2. What is a card?
   Answer: A clickable prompt during the video.

Key takeaways

- One clear next step.
- Cards at the right moment.
- End screens in the last seconds.

Completion checklist

Done	Item
☐	End screen added.
☐	Card added.

LECTURE 7.14 · PILLARS: OPTIMISE

Comments and community

Moderate comments, reply to viewers and build a community.

Learning objective

Moderate comments, reply to viewers and build a community.

- Reply to early comments to start conversations.
- Hold comments for review or set filters, and block spam and abusive users.
- Pin a helpful comment with a question or next step.
- Use the Community tab, where your channel allows it, for polls and updates.

WATCH OUT

Never reply to a comment with a private contact request or a link to an outside site from an unknown account. Report scams.

Practice

Set your comment filter. Reply to five comments on your test video.

KNOWLEDGE CHECK

1. Why reply to early comments?
   Answer: It starts conversations and signals an active channel.
2. What should you do with spam?
   Answer: Hold, filter or report it.

Key takeaways

- Reply early.
- Filter spam.
- Pin a useful comment.

Completion checklist

Done	Item
☐	Filters set.
☐	Five replies sent.

LECTURE 7.15 · PILLARS: APPLY

Monetisation and sponsorships

Understand the main ways a channel can earn money, and their rules.

Learning objective

Understand the main ways a channel can earn money, and their rules.

- YouTube Partner Program: ad revenue and other features, with eligibility rules (check the current thresholds in YouTube Help).
- Memberships, Super Thanks and other fan features where eligible.
- Affiliate links: disclose them clearly.
- Sponsorships: disclose paid promotion as the platform and your country require.
- Your own product or service: often the most valuable route for a business.

VERIFY FIRST (TIME-SENSITIVE)

Partner Program thresholds (subscribers, watch hours or Shorts views), eligible countries and monetisation policies change. Verify on the YouTube Partner Program page before you plan income.

Practice

Write a one-page plan for how your channel will earn, with the disclosure you will use.

KNOWLEDGE CHECK

1. What should you disclose?
   Answer: Paid promotion and affiliate links.
2. Why is your own product often valuable?
   Answer: You keep the margin and the customer relationship.

Key takeaways

- Know the eligibility rules.
- Disclose paid content.
- Own offers often pay best.

Completion checklist

Done	Item
☐	Monetisation plan written.
☐	Disclosure text chosen.

LECTURE 7.16 · PILLARS: OPTIMISE

YouTube Analytics: retention and CTR

Read Analytics to decide what to change next.

Learning objective

Read Analytics to decide what to change next.

- Impressions click-through rate (CTR): how often viewers click when your thumbnail is shown.
- Average view duration and audience retention: where viewers stay or leave.
- Traffic sources: search, suggested, Shorts, external.
- Use one metric change at a time to learn what works.

Illustrative example (invented data)

Video	Impressions	CTR	Avg. view duration	Action
A	5,000	3%	1:20	Improve thumbnail
B	3,000	7%	0:40	Tighten the intro

Practice

Review your test video's analytics after 48 hours. Write one change to make next.

KNOWLEDGE CHECK

1. What does retention show?
   Answer: Where viewers stay or leave.
2. What is CTR?
   Answer: The share of impressions that become clicks.

Key takeaways

- Use CTR and retention together.
- Change one thing at a time.
- Examples are not benchmarks.

Completion checklist

Done	Item
☐	Analytics reviewed.
☐	One next change written.

LECTURE 7.17 · PILLARS: APPLY

Capstone assignment: YouTube marketing

Build and launch a complete channel plan with one published video.

Learning objective

Build and launch a complete channel plan with one published video.

1. Create or set up your channel with a clear name, description, banner and profile picture.
2. Plan 10 video ideas using keyword and competitor research.
3. Make, title, describe and caption one video; design its thumbnail.
4. Add an end screen, a card and a playlist.
5. Publish, reply to comments, and review analytics after 48 hours.
6. Write a 30, 60 and 90 day plan.

Practice

Submit the capstone checklist with your channel link.

KNOWLEDGE CHECK

1. What is the capstone?
   Answer: A complete channel plan and one published video.
2. What must the plan include?
   Answer: Ideas, one video, thumbnail, end screen, analytics review and a 90-day plan.

Key takeaways

- Build a complete channel plan.
- Publish one video.
- Review and plan.

Completion checklist

Done	Item
☐	Channel set up.
☐	One video published.
☐	90-day plan written.

CHAPTER 7 · QUIZ

Chapter 7 quiz (10 questions)

Answer in your own words, then check the answers below.

1. Which YouTube feature shows a video to viewers while they browse?
   Answer: Suggested videos feed.
2. What is a brand account for?
   Answer: Letting several managers run one channel.
3. Why should you upload as private first?
   Answer: To check the video before the public sees it.
4. What should a title and thumbnail do?
   Answer: Show the true promise of the video.
5. What is CTR?
   Answer: The share of impressions that become clicks.
6. Which metric shows where viewers stop watching?
   Answer: Audience retention.
7. Where do end screens appear?
   Answer: In the last seconds of a video.
8. What should you copy from a competitor?
   Answer: The idea or topic, not their content.
9. What must you do before publishing AI-drafted claims?
   Answer: Check every fact and number yourself.
10. What is the safest first level for connecting Claude to YouTube?
    Answer: Copy and paste, with manual upload.

Glossary

Term	Meaning
Audience retention	How much of a video viewers watch, shown as a curve.
Brand account	A channel account that several managers can run.
CTR (click-through rate)	Clicks divided by impressions.
Chapters	Timestamps in a description that split a video into named parts.
Custom thumbnail	An image you upload to show on a video.
End screen	Elements shown in the last seconds of a video.
Impression	A time YouTube showed your thumbnail to a viewer.
OAuth	A secure way for an app to act on your account without your password.
Partner Program	YouTube's programme for earning from ads and features when eligible.
Playlist	An ordered list of videos on a channel.
Quota	A daily limit on how many API actions a project can make.
Shorts	Short vertical videos in their own feed.

Completion checklist

Done	Item
☐	Channel created with the right account type
☐	Free tools chosen with limits noted
☐	Three strategy options compared; one chosen
☐	Gear tested with a 30-second clip
☐	First video recorded, edited and checked as private
☐	Ten ideas from competitor and keyword research
☐	Title, description and chapters written
☐	Thumbnail designed and checked for honesty
☐	Banner and profile picture checked on two devices
☐	End screen and card added
☐	Comment filter set; five replies sent
☐	Monetisation rules read on the official page
☐	Analytics reviewed after 48 hours
☐	Claims verified on official pages before publishing
☐	90-day plan written

Workbook

1. My channel

Field	My answer
Channel name	
Account type (personal or brand)	
Main strategy (educate, show, connect)	

2. My order of lectures

My order	Lecture	Why I placed it here
	7.1	
	7.2	
	7.3	
	7.4	
	7.5	
	7.6	
	7.7	
	7.8	
	7.9	
	7.10	
	7.11	
	7.12	
	7.13	
	7.14	
	7.15	
	7.16	
	7.17	

3. Video package check

Item	Done	Verified on official page?
Title	☐	☐
Description with chapters	☐	☐
Thumbnail	☐	☐

End screen and card	☐	☐

4. Analytics after 48 hours

Metric	Value	What I will change
Impressions		
CTR		
Average view duration		

Next steps

Finish the capstone (lecture 7.17), then go to Chapter 8 when it is ready. Keep one video a week, review analytics every month, and check every official policy before you scale.
